**LP GAS TANK DELIVERIES**

# THE MOFFETT LP TANK DELIVERY SYSTEM

Delivery of LP gas tanks can be challenging, due to limited access sites. The MOFFETT truck mounted forklift provides a smaller footprint than traditional boom trucks and greater accessibility.

With the simple tank clamp, operators can move multiple tanks quicker and more efficiently than traditional crane trucks. The clamp secures the tank on the forks of the MOFFETT, keeping the tank in place even across rough terrain. When not in use, the MOFFETT tank clamp stows out of the way so standard loads can be carried with the MOFFETT without interference from the attachment.

**Compact:** With a wheelbase that is less than one-third of a traditional delivery truck and the ability to turn within its own radius, the MOFFETT can reach placement spots not possible with a traditional service truck and crane combination.

**Superior Terrainability:** The MOFFETT features an all-wheel-drive system that can easily power through all types of terrain. Even on construction sites or remote, wooded areas - the MOFFETT can place a tank virtually anywhere. Because of its lightweight design, the MOFFETT is also gentle on driveways and residential lawns.

**Multiple Configurations:** The MOFFETT handles tank sizes from upright cylinders to 1,000 gallon tanks. Depending on your choice of delivery vehicle, body length, and tank size, you can carry more than a dozen tanks at a time. At the delivery location, the truck is conveniently left on the street, while the MOFFETT performs the tank placement.

**Cost Savings:** The MOFFETT LP tank delivery system allows you to buy less costly service vehicles. There is no need for high GVW, 4WD service trucks with stiff boom cranes because the MOFFETT does all the heavy lifting. This saves money on both purchases and fuel costs, as well as freeing your trucks to do what they were primarily designed for - looking after your customers.

With MOFFETT's market-leading reliability, safety, and reputation, combined with a nationwide service and support network, the MOFFETT is a fast, safe, and efficient delivery solution that will redefine your delivery process.

Hiab HiConnect™ is the first Connected service that we have launched. It keeps you one step ahead with next-generation intelligence today. By enabling new insights, it helps you to further increase efficiency, productivity and safety.

With HiConnect, you receive real-time data about your Hiab equipment's operation and condition. The practical and simple web portal gives you an unprecedented level of control of your operations. The power to improve your performance and safety as well as avoid unnecessary downtime is now at your fingertips.

HiConnect is available for all products equipped with connectivity and marked with the connectivity symbol. Availability and functionality may vary between markets. Please consult your local Hiab sales representative for details.
